

throws keyword rules

- 1) we must place throws keyword only in method and constructor declarations after signature
- 2) It is not allowed in class, SB and IIB declarations
- 3) after throws keyword we can place only Throwable type class name.
- 4) after throws keyword we can place multiple class names but with , separator.
- 5) mandatory to use with checked exception and optional to use unchecked exception
- 6) if super class method does not have throws checked exception we can not add throws checked in sub class while overriding
